

Your full-service provider

Cross-industry services in the field of information and communication technology.

Our range of services covers the full spectrum of information and communications technology (ICT). Thanks to our custom solutions for small and medium-sized enterprises (SMEs), we are the ideal IT partner for our customers.

With our wide spectrum of future-oriented ICT solutions and a global team of 300 employees, we support our SME customers across their entire value-added chain. If necessary, we provide these customers with round-the-clock assistance 365 days a year. Our services are always tailored, reliable and quality-assured.

Whether our customers need short-term consulting services and workshops, assistance with

complex projects or outsourcing services, our dedicated team of highly skilled professionals ensures that we reach our shared goals and keep our commitment to quality. Instead of off-the-shelf concepts, we offer tailored services that ensure outstanding security, flexibility and resource availability. In this way, our customers can focus on the essentials: their business, customers and processes. Tailor-made quality and expertise are the foundation of our services.

Our cross-industry service portfolio encompasses

- management consulting (including strategy, process and organizational consulting) as well as IT strategy consulting.
- consulting, development and operation services for the industry-standard software solutions SAP ERP, Microsoft Dynamics AX and SAP Business One, including interface implementation.

>>>
